

Added Documents - PDF Format

In line with many web applications documents that have been added to this Web Site are converted to a PDF format. The reason for this is that documents can be in many different formats, and some of these, some computers may not be able to open, as they do not have the appropriate software.

Most computers sold generally have the ability to open PDF format files. If however you find yours does not for whatever reason, you can download Adobe Reader free of charge from Adobe Reader website, that will enable you to open these files. Be aware you may need to remove a tick, that asks to download other software you may not want.
