

## World's first pothole preventing robot passes first test with flying colours

The autonomous robot, developed by tech company Robotiz3d and academics at the University of Liverpool in partnership with our Highways Engineers, has passed its first test outside of a lab environment, on the roads of Potters Bar on 6 March 2024.

The robot has the potential to save time and money as well as reducing the disruption potholes cause to road users. [Read the full story.](#)
