

Metal Embossed Cards: November'22

In November, a group of twenty seven crafters met to try their hand at metal embossing. We embossed some festive shapes which we cut out and used to make some Christmas Cards. Although the shapes were mostly either presents, stars or trees, the way in which we assembled our cards using different ribbons, different coloured metals, metal wire and backing papers meant that each card was unique – there was a great variety of cards of various colours and designs. I'd be very pleased to be the recipient of any of them!
