

## Thread Catchers: April 2018

At our April meeting we tackled a sewing task. We made collapsible thread catchers. These are handy little pots, useful for holding all those nuisance threads and bits of material that are snipped off when sewing. With a little twist, the pot collapses in on itself so it takes up hardly any space at all. One of our group (who is not so fond of sewing!) has found that it makes a decorative container in the car for holding her loose change for the car park!
