Apple Apps 2023

A new approach to this group finds us looking more in detail at the apps that are available to be used on iPhones and iPads which has proved popular with those that have been able to attend.

Always difficult to fill the shoes of a technical guru in Phil Singleton, we have instead been looking to share learning an experiences on the software side rather than dwelling too much on the hardware and operating issues.

So this year we have looked under the bonnet of Numbers and Pages, had a go at using iMovie, investigated the features of Google Maps and compared them with Apple Maps and Waze, as well as discovering the new offering of iOS 17 and what that can do.

We meet on zoom every month at 5pm on the second Thursday of each month and are always open to new members. Bring your Apple devices along and see what you can share about how best to use them!

Philip Lawson
Group Facilitator
