

## **Japanese Language Group Report 2023**

This is a fairly new group, formed this year. We currently have 6 members but would like to recruit more to keep the group viable. We started by looking at various places in Japan and learning greetings.

So far in writing, we have been learning hiragana and katakana and have just started to learn basic kanji. In speaking we have covered greetings, the copula and have started to use verbs in both the plain and polite forms. We have also covered time, dates, counting and money to name but a few other areas.
