

Wirral Arts Festival

Science Day

At Heswall Hall, Telegraph Road, Wirral, CH60 0AF

Thursday 14th October 2021

Programme

09.30 *Exercise, 10,000 steps per day and weight loss:
Are you sitting comfortably?*

Daniel Cuthbertson Liverpool University

Professor Cuthbertson examines the latest scientific evidence around the health benefits of exercise and avoiding sedentary behaviour

11.00 *How wild is the world?*

Will Beale Chester Zoo & World Wildlife Fund

Mr Beale informs us about the current scientific understanding of the state of the world's wildlife and the future outlook.

13.30 *Particle physics: from imagination to reality*

Jaclyn Bell Imperial College London

Dr Bell tells us about the exciting world of particles, how they came to be and where our scientific and engineering endeavours might take us next.

15.00 *The diversity of animals: from Darwin to DNA*

Peter Holland Oxford University

Professor Holland explores how animal evolution is studied today, with focus on remarkable insights gained from molecular biology and genomic sequencing

£2 per lecture—pay at the door
(Free for Heswall U3A members)

Sponsored by Heswall U3A & organised by
West Wirral and Mid Wirral Rotary Clubs
