#### Format

Monthly meetings with one or more presentations by members dealing with some topic related to environmental matters, often accompanied by slides and/or videos. We then have lively discussions with tea, coffee and cake.

We have covered a large range of topics from Hurricanes to extinction of Pangolins and other plant and animal species: deforestation and attempts to counter this such as the charity "The size of Wales." Kelp farming and the problems of soil erosion.

We also dealt with matters of energy, including alternative energy.
