

Power to the people...?

Exactly how large are our problems going to become?

- Are we going to go back to the dreadful days of 1972?
- Will we have to bear the brunt of power cuts?
- Do we have any backup supplies?
- What will happen if gas supplies are completely cut off?
- Now that we realise that it is possible to find and destroy undersea pipelines, how vulnerable are our intercontinental power interconnectors and fibre optic communication links?

The Science & Technology Energy debate Thursday October 20th

- Join us at the Glebe Centre. 1:30 for 2:00 pm
- Bring along any facts and figures
- Air you concerns and debate your ideas
- Everyone is welcome!
- How many more tricks has President Putin up his sleeve?
