

DIGITAL PHOTOGRAPHY

The group has discussed the idea of producing a presentation about the Grange prom. Shots had already been taken before the work started and an ongoing assignment is to get shots of the work in progress. For our November meeting members were challenged to shoot current day images of the archive photographs collected by the Grange Photographic Society at the beginning of this century and shots taken during the pre-lockdown open days at the Lido. This was no easy task because of the changes that have taken place over the last 100 years and more.

No meeting was held in December as the regular slot was very close to Christmas. For our January meeting members were asked to contribute any images making use of the low angle of the sun in the sky and/or the wide variety of weather conditions being experienced at this time of year. It turned out to be a real gallimaufry including some striking images produced with the aid of AI (artificial intelligence). The February meeting included a demonstration of this and a look at night time photography.

New members, of any ability, are welcome and we always need ideas for topics for inclusion in the programme. We meet on the third Thursday of the month at 2.00 pm usually in Grange Institute.
