

## **GENERAL HISTORY**

-  
As planned, our meetings resumed on Thursday 1<sup>st</sup> September, continuing with our theme based around “time, when we heard about the way in which time has been saved as a result of the acceleration of travel and the impacts that this has had on the globe. We followed this up with sessions on time in music i.e. “tempo”, which provoked a wide ranging discussion, and short cuts to save time i.e. maritime canals.

Future sessions have been planned to include Manufacturing and deliveries “just in time”, Myths of time travel, Clocks through the ages and Speed limits and records.

Our normal meeting time is the first Thursday in the month at 2.00 pm. If you are interested please contact Malcolm Kimber using the message button on the “General History” website page.
