

## **GENERAL HISTORY**

The group organises its meetings around particular themes. Our current theme is the quite challenging one of “time”. Last year we held a brain storming session in which we came up with ideas that might be included and members then chose which one they would like to give a talk on.

Our February meeting considered the origins of our system of recording time and the role of natural phenomenon in determining this and then looked at the various ways in which time has been measured over the ages.

Our normal meeting time is the first Thursday in the month at 2.00 pm.
