

Triolet®

Where every number counts

As absorbing as the best word games, but played with numbers.

For 2 to 4 adults or children from age 8+

Contents : 15 x 15 squared board, 81 tiles numbered 0 to 15, 2 jokers, 4 players' racks, cloth bag for tiles, rules plus hints on play and how to score.

Object of the game: on each go, place 1, 2 or 3 tiles in a line, horizontal or vertical, touching one or more existing tiles. Players score points for each of the group of 2 or 3 tiles they create, including bonuses for **Trios** and premium squares.

Key Rules:

- 2 tiles side by side must total 15 or less
- 3 tiles side by side must total exactly 15, e.g. $8 + 3 + 4 = 15$, $10 + 5 + 0 = 15$
- The run of 3 tiles is called a **Trio** and scores a bonus
- There must never be more than 3 tiles side by side or up and down
- 2 jokers and the squares **DOUBLE**, **TRIPLE** and **BIS** (another go) add extra excitement.

$$\boxed{8} + \boxed{3} + \boxed{4} = 15 \quad \boxed{10} + \boxed{5} + \boxed{0} = 15$$

The Winner is the player with the highest score. Triolet is a game of strategy and clever calculation, but beware....chance can also play a part and could turn things upside down at any moment.
