

Grading System for Walks

I have had a couple of queries about the Grading system we use for walks. Nothing is set in stone and much of it is common sense, but as a rough guide here goes:-

Grade 1: Flattish walk with few, if any, gradients. E.g. Saumarez Park to Cobo. Green lanes of the Vale. Usually between 1 hour and 1.5hrs

Grade 2. A few gentle gradients and/or steps. E.g. St Martins/Forest lanes. Back streets of Town. Reservoir walk. Around 1.5hrs

Grade 3. Steeper gradients and rougher terrain. E.g. Cliff paths from Jerbourg to Moulin Huet. 1.5hrs to 2 hrs

Grade 4. Hard climbing over rough terrain. E.g Cliff paths from Le Prevote to Pleinmont 2.00-2.5hrs
