

Hey Joe

by Love

Key: A

Notes

On all of the 'A' chords just take finger off the 2nd string then put it back onto the 2nd fret then put 4th finger on 2nd string onto the 3rd fret then take 4th finger off to return to a normal A chord

The F-C-G-D-A chord pattern is played at the same timing for all lines to provide rhythm and beat. Words are just fitted in around the constant chord changes.
