Burgess Shale Walcott Quarry Fly-in

<http://www.burgess-shale.rom.on.ca/en/introduction/04-flying-video.php>

Anomalocaris

The largest predator of the Cambrian

<http://burgess-shale.rom.on.ca/en/fossil-gallery/view-species.php?id=1&ref=i&>

Olenoides serratus

The best-known trilobite from the Burgess Shale

<http://www.burgess-shale.rom.on.ca/en/fossil-gallery/view-species.php?id=11&m=1&&ref=i>

Ottoia prolifica

The most common Burgess Shale worm

<http://www.burgess-shale.rom.on.ca/en/fossil-gallery/view-species.php?id=95&m=1&&ref=i>

Aysheaia pedunculata

A very primitive arthropod-like animal with spiked legs

<http://www.burgess-shale.rom.on.ca/en/fossil-gallery/view-species.php?id=22&m=1&&ref=i>

Marrella

An arthropod with long head spines

http://www.burgess-shale.rom.on.ca/en/fossil-gallery/intro_7.php

Nectocaris pteryx

A squid-like predator with a pair of long tentacles

<http://www.burgess-shale.rom.on.ca/en/fossil-gallery/view-species.php?id=87&ref=i&&ref=i>

Hallucigenia

A prickly worm with a twisted history

http://www.burgess-shale.rom.on.ca/en/fossil-gallery/intro_4.php

Opabinia regalis

A primitive arthropod with five eyes and a long “nozzle” with claws

<http://burgess-shale.rom.on.ca/en/fossil-gallery/view-species.php?id=93&m=1&&ref=i>

Wiwaxia corrugata

An armoured slug-like organism

<http://burgess-shale.rom.on.ca/en/fossil-gallery/view-species.php?id=132&ref=i&>

Pikaia gracilens

A very primitive fish-like animal

<http://burgess-shale.rom.on.ca/en/fossil-gallery/view-species.php?id=101&ref=i&>

Royal Ontario Museum Burgess Shale Fossil Gallery
