

Equipment for use by groups

Perth u3a has provided a range of equipment for use by groups.

Unit 7

During the summer of 2022 Unit 7 was fitted with a hearing induction loop system. You will find guidelines for its use displayed on the wall in the room.

The room has a pull-down fitted projection screen, an Epson data projector and a Dell laptop. There is also a Bluetooth speaker and a mains powered stereo speaker pair. A 4-socket cable reel is provided to facilitate setting up this equipment. This equipment is housed in a locked cupboard in the far left corner of the room as you come through the door. If you need a key for this cupboard contact me (as below) and I can either lend you one for one-off use or provide one for regular use. The cupboard contains an instruction sheet for setting up the projector and laptop but if you would like a run through please let me know. There is also a folding projector/laptop stand stored next to the cupboard.

Equipment for use outwith Unit 7

In addition to the equipment in Unit 7 I keep the following:

- HP laptop and Epson data projector
- Small folding projection screen
- Wireless presenter for remote slide changing

Also in the locked cupboard in Unit 7 but available to use outside Unit 7:

- Older Epson data projector with VGA only input
- Large folding projection screen in carry case

If you wish to borrow any of this equipment for your group or would like any further information, please contact me.
