

## Weather and Climate Group (Len Wood)

Yet another Christmas with dull, wet and windy weather. There is a meteorological term for that, 'grotty'. At least we were not stuck in snow drifts. We don't want cold weather but it would be nice to see some sunshine during the shortest days.

Winters (Dec., Jan., Feb.) since 1986 are becoming warmer as show by the linear trendline in the graph below for Wembury.
