

SIMPLE CARD MAKING

Have you ever wanted to make a card but didn't know where to start? Then enjoy following the simple instructions below.

Simple "bag" card

You will need:

Blank card 5x7inch plus envelope

2 squares of coloured and patterned card, 2x2 inch

2 White card squares 2 1/4

2 pieces of garden twine or thin cord/ ribbon

A peel off sentiment (or add your own handwriting)

Tacky glue or pritstick

Sticky foam pads (optional)

(most materials can be obtained from the Works or the Range)

Assemble the bags by sticking the white square card to the back of the coloured/patterned ones (showing an even white margin all around)

Take the twine, or whatever you are using as a handle, and fix to the back of your squares as shown.

Mount the bags onto your card blank, leaving space for the sentiment. If you are using foam pads the bags will stand out from your card giving a 3D effect, or you can glue an extra layer of card to the backs of the bags for a similar "lift".
