

Sussex Yacht Club (SYC) Emergency Evacuation Drill

There is always at least one fire Marshall on site.

The Sussex Yacht Club require you to have a list of all names of those who attend each group meeting.

In event of emergency:

The fire alarm will sound, and SYC require all to evacuate and leave by fire exits – all clearly signposted. Please check the emergency exit from the room you are using.

The alarm is tested every Monday morning.

In an emergency you cannot use the lift – should someone be upstairs / in the admiral's room there is a refuge call button – this will show on the fire panel and aid will arrive.

Everyone is to congregate at the end of the slip way where there is a fire meeting point.

Fire marshals' will also be on site to assist/ advise.
