

July 12th 2021

In this Zoom session, the group members discussed Apps that they used, or that they had heard about. Some were free, others had to be subscribed to.

Those mentioned included:

Health: **The NHS App**, which enables you to order a prescription, make an appointment with your GP, access medical records and provide proof of vaccination. Also the **Health App**, available on iPhones, which can be edited to give personal information and count walking steps daily.

Apps that will record a bird singing and then identify the bird; those mentioned included **BirdSongID UK** and **Chirpomatic**

Measuring Apps: **Tape measure** (for iPhones); **Runkeeper** (for recording walking/running routes and measuring the distance covered).
