Terms of Reference for Help and Discussion Drop-in Sessions on Zoom

This drop-in session is provided with the intention of members coming together to share knowledge, experience and best practice on various aspects of technology, including software, of interest to u3as and their members.

We are unable to offer one-to-one advice to u3as and their members as all locations and abilities differ and operational decisions need to be made by the individual u3as.

Items of equipment or software shown or listed in these sessions are there to give an idea of what is needed and the approximate cost.

It is not to be treated as a recommendation or that it is the only suitable piece of equipment or software.

What you may decide to purchase is for you or your own u3a to choose based on available funds and your own particular needs.

Video Editing – A Review & Refresh

Let's Review my LTT Presentations from July 2022

On 20 July 2022 I shared how I created a Video Intro for a video of our Ravenshead u3a Belly Dancing Group using PlaceIt (free software)

It's available to view in the Files section of the Let's Talk Tech Facebook Page

Justin Brown has a PlaceIt video tutorial (https://youtu.be/r7hULM1qRf4)

The following week I shared a video showing how I created the actual Belly Dancing video using my licensed Wondershare Filmora Video Editing Software that I have on both my PC & Macbook

Let's view the completed video (https://youtu.be/zf2JIgpwPMU)

Let’s Review my LTT Presentations from July 2022

Here’s the first few minutes of a video I showed the following week demonstrating how I created the actual Belly Dancing video using the licensed version of Wondershare Filmora Video Editing Software I have on both my PC & Macbook

Let’s view this short edit of the original 45 minute long video at : (https://youtu.be/ik4Y4kvUchM)

Video Editing – A Review & Refresh

Just in from Justin Brown! (*from his Primal Video Insider email list*)

Hi John,

Ever tried doing a simple task using the WRONG tool?

Making minor repairs with tape instead of glue...
Trying to coordinate meetings with 5 people, back & forth over email (🤦)...

Or doing your 'accounting' in spreadsheets... (yeah, sorry Mike.)

Whatever the job, it ALWAYS ends up costing more time in the long run.

The same goes for Video Editing software.

In fact, most people I hear complaining about how painful their video editing is **are just using the WRONG software for them!**

Don't get me wrong - it's not their fault...

There's a ton of options out there and it's easy to think you need to go for the 'biggest and best'. But in most cases, unless you're looking to become a professional editor, you're just setting yourself up for a LOT of wasted time & headaches.

Now the good news:
It takes less than 15 minutes to check if you're using the best software for YOU (... actually half that time if you watch videos on 2x 😉)

How? **Check our video editing software roundup videos below!**
