LET'S TALK TECH DROP-IN SESSION

u3a

Wednesday
3rd May 2023

**What Progress is being made
towards Carbon-Free Air Travel?**

Terms of Reference for Help and Discussion Drop-in Sessions on Zoom

This drop-in session is provided with the intention of members coming together to share knowledge, experience and best practice on various aspects of technology, including software, of interest to u3as and their members.

We are unable to offer one-to-one advice to u3as and their members as all locations and abilities differ and operational decisions need to be made by the individual u3as.

Items of equipment or software shown or listed in these sessions are there to give an idea of what is needed and the approximate cost.

It is not to be treated as a recommendation or that it is the only suitable piece of equipment or software.

What you may decide to purchase is for your own u3a to choose based on available funds and your own particular needs.

This session is being recorded for future sharing by the Trust to the u3a community and others with a published link.

If you do not wish your face to appear in the edited video, please ensure that your Zoom video setting is set to off, and if you choose to unmute yourself, please note that sounds or speech may also trigger your voice, image or name on screen which are likely to appear in the final recording

If this concerns you, please exercise your choice to leave the session, so you don't appear in such videos. Any questions you may have can be raised in the Zoom chat and may be relayed by a member of the LTT team to the participants.

What Progress is being made towards Carbon-Free Air Travel?

Are you flying off on holiday this summer?

**Do you ever consider the environmental cost to the
planet?**

Is carbon offsetting for air travel a cop-out?
